

January 15, 2016

To Whom It May Concern:

STUDENT NAME has been granted admission to attend LHPU's "Fundamentals of Control Systems – Diesel" training program. This hands-on controls training program takes place in Columbus, Indiana from January 19 – February 26. Attending this hands-on training course is voluntary and requires that 40 hours per week be spent at our training facility.

**The course covers the following modules:**

- J1939 CAN Communications
- Embedded Systems
- MATLAB and Simulink
- Throttle Control Project
- Diesel Engine System
- MotoTune ECU Calibration Tool.
- Diesel Engine and Controls Project – (Speed Governing; Controls Model; System Diagrams; Wiring; Code Generation; communicating with CAN)

Upon successful completion of the training program, graduates receive a "Certificate of Mastery" in Control Systems Engineering from SAE International.

Attending this course will greatly improve the trainee's skills in the area of embedded controls and the possibility exists that there will be several potential job offers at the end of this hands-on training course.

STUDENT NAME will not be employed by LHP Software or any of its affiliates during this hands-on training program.

Please contact me at (812) 552-8813 if you have any questions or need more information. You can also email me directly at [pamela.tartt@lhpes.com](mailto:pamela.tartt@lhpes.com).

Sincerely,

A handwritten signature in black ink, appearing to read 'Pamela G. Tartt', written in a cursive style.

Pamela G. Tartt  
Vice President of LHPU
